INTRODUCTION

INTERNATIONAL AEROSPACE ABSTRACTS (IAA) is an abstracting and indexing service covering the world's published literature in the field of aeronautics and space science and technology. IAA is issued semimonthly, on the 1st and 15th of each month.

Coverage of Published Literature

The following types of publications are covered in IAA:

- Periodicals (including government-sponsored journals) and books.
- Meeting papers and conference proceedings issued by professional societies and academic organizations.
- Translations of journals and journal articles.

Coverage of Reports ("Unpublished" Literature)

Abstracts and indexes of report literature are issued in SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS (STAR), which is published by the Scientific and Technical Information Branch, National Aeronautics and Space Administration.

By special arrangement between NASA and the American Institute of Aeronautics and Astronautics, IAA is issued in coordination with the twice-monthly schedule of STAR, which appears on the 8th and 23rd of each month.

IAA and STAR both utilize identical subject categories and indexes, which are described below.

Thus the two services provide comprehensive access to the national and international unclassified report and published literature of current significance to aerospace science and technology.

Arrangement of the Semi-monthly Issues

IAA is arranged in two major sections:

- (1) Abstracts Section. This section contains complete bibliographic citations with informative abstracts as required, arranged by appropriate subject categories to facilitate scanning. There are 75 subject categories, and the scope of each is outlined in the Table of Contents and again as they appear in the Abstracts Section. Each entry is prefixed by the IAA accession number.
- (2) Index Section. Five indexes are contained in this section: Subject, Personal Author, Contract Number, Meeting Paper and Report Number, and Accession Number. Each index is prefaced by explanatory notes.

Cumulative Index

A cumulative index appears each year. The Annual Cumulative Index, distributed in January, covers all 24 issues published from January to December.

The cumulative index contains the following sections: A—Subject Index, B—Personal Author Index, C—Contract Number Index, D—Meeting Paper and Report Number Index, and E—Accession Number Index.

Indexing Vocabulary

The 1982 Edition of the NASA THESAURUS (NASA SP-7051) is the authority for the indexing vocabulary that appears in the subject indexes to STAR and IAA. The NASA Thesaurus should be consulted for a total picture of the current indexing vocabulary and associated cross-reference structure. Copies of the NASA Thesaurus may be obtained from the National Technical Information Service (NTIS), Springfield, VA 22161 at a price of \$55. for the two-volume set.

Information regarding SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS may be obtained from the following address:

National Aeronautics and Space Administration

Attention: Code NIT—44
Washington, DC 20546

how to obtain publications announced

Documents announced are available from the AIAA Technical Information Service as follows:

- Paper copies of accessions announced in IAA and STAR and of other documents in the TIS library are available at \$8.50 per document.
- Microfiche of documents announced in IAA are available at the rate of \$1.45 per microfiche for standing orders for all IAA microfiche, and at the rate of \$4.00 per microfiche for individual documents on demand. Documents available in this manner are identified by the symbol † following the accession number in the Abstracts Section and the symbol # in the Abstracts Section and in the Meeting Paper and Report Number and the Accession Number Indexes.
- Minimum air-mail postage to foreign countries is \$2.50.
- A number of publications, because of their special characteristics, are available only for reference in the library.

Address all inquiries and requests to:

REQUESTING PUBLICATIONS**

CROSS REFERENCES

The subject index includes two types of cross references to aid the user of the index in locating the material being sought:

1. "USE" references (U) direct the user to alternate headings under which material on the subject will be found, for example

COLUMBIUM
U NIOBIUM

2. "NARROWER TERM" references (NT) refer the user to more specific headings in the same subject area, for example

LUMINESCENCE
NT ELECTROLUMINESCENCE

The periodicals listed in this section contain material accessioned in *International Aerospace Abstracts* in 1983. The eight-digit hyphenated number at the end of a listing represents the ISSN number. The periodicals were received regularly in all but a few instances. In the case of titles preceded by an asterisk, only the articles announced in *International Aerospace Abstracts* are available. All announced articles can be obtained from the AIAA Technical Information Service.

The subject heading is the key to the subject content of the document. Titles of documents are followed by the *IAA* issue numbers, page numbers, and accession numbers under pertinent subject headings. When the title is insufficiently descriptive of document content, a title extension has been added (separated from the title by three hyphens) to better describe the content of the document. The titles, with title extensions if present, are arranged under each subject heading in ascending accession number order.
